PROFESSIONAL SUMMARY

Backend-focused Full-Stack Developer with hands-on experience in Django for real-world university workflows. Built and deployed production-level applications with secure authentication, role-based authorization, and payment gateway integration. Strong problem-solving ability and self-learning mindset, seeking SDE/ Backend/ Full Stack Internships.

KEY SKILLS

Full-Stack Web Application | Backend Architecture | Custom workflow Architecture | Role-Based Access Control(RBAC) | Payment Gateway Integration (Razorpay) | Scalable System Design for Real-World Use Cases | Self Learning and Prototyping |Multi-Level Authentication & Role-Based Authorization| Excellent Communication Skills

TECHNICAL SKILLS

Python | JavaScript | Django | React.js | Git | Github | Render | Razorpay | Django ORM | MongoDB | SQLite | MySQL | Railway | Databases | Data Structures | Basic Algorithms | Bootsrap and TailwindCSS Configurations | Object oriented programming | Django Ninja APIs

PROJECTS

HostelNet – Virtual Hostel Allotment System

Tech Stack : Django, SQLite, HTML/CSS, Bootstrap

Deployed : <https://hostelnet.pythonanywhere.com> | Source : <https://github.com/akshit-git24/HostelNet.git>

- Built a hostel room allocation system eliminating first-come-first-serve bias.
- Implemented multi-step verification: university approval, student validation, preference-based allocation.
- Deployed live, enabling fair allotment across multiple hostels.

TechSpark – University Event Management System

Tech Stack : Django, SQLite, Razorpay API, HTML/CSS/JS, Render, GitHub

Deployed : <https://render-k2yw.onrender.com> | Source : <https://github.com/akshit-git24/EventSpark-Event-Booking-System.git>

- Developed a role-based event portal with 4 staff hierarchies and student verification workflows.
- Integrated Razorpay payments for registration & event booking.
- Designed RBAC with secure authentication for event approval pipeline with department-level permissions .

Ticket Booking Web Application

Tech Stack: Django, MySQL, HTML/CSS, Bootstrap, Javascript, Railway, Render

Deployed : <https://deployment-assignmnet.onrender.com/> | Source : <https://github.com/akshit-git24/Ticket-Booking-App-Assignment-git>

- Built a full-stack ticket booking system with Django & MySQL, deployed using Railway (DB hosting) and Render (backend/frontend).
- Implemented user authentication, booking management, and real-time seat availability features.
- Completed the project in ~20 hours as part of a backend intern application assignment for Travel Lyyke, demonstrating ability to deliver production-ready solutions under strict deadlines.

EDUCATION & CERTIFICATIONS

BACHELOR'S DEGREE (B.S) | Data Science and Programming | IIT Madras

2024 – 2027

BACHELOR'S DEGREE (B.TECH.) | Computer Science & Engineering | Guru Nanak Dev University

2024 – 2028
